U978S QUICK DETACHABLE DOUBLE RAIL SIDE MOUNT INSTALLATION GUIDE

Made in USA

Caution: Make sure firearm is not loaded. Remove magazine and examine chamber. Use safe handling procedures at all times.

1. Before installation, first loosen the Adjustment Screw by turning it clockwise with a proper screwdriver. Make sure that the Quick Release Lever is at the Released Position.

2. Slide the mount onto the side rail and keep pushing forward until the mount is fully engaged.

3. The Quick Release Lever at this point should be at the Released Position (pointing rearward) as shown in ①. Use the screwdriver to gently turn the Adjustment Screw counter-clockwise to achieve a proper tension level. Do not over-tighten.

4. Set the Quick Release Lever to the Locked Position (pointing forward) and make sure the mount is completely secured.

5. A detachable 6-slot Picatinny rail is provided for your additional accessory attachment.

Warning: Please do NOT over tighten the Adjustment Screw to avoid damaging the Quick Secure/Release function.
