

FRONT BACK-UP SIGHT

DESCRIPTION

FBS is an advanced, low-profile, durable, auxiliary front sight. It can be used with any rear sight, but has been designed to provide an extreme optical advantage when paired with the FAB Defense® RBS Rear Back-up Sight. Sight pin elevation is easily and quickly adjusted without tools.

FBS is readily mounted on any 1913 Picatinny rail, making it ideal for use on M4 / AR-15 / M-16 platforms and on the FAB Defense® KPOS.

Advantages:

- ▶ Can be used as a primary or back-up sight
- ▶ Ergonomic angel-wing-shaped front shroud helps center the image with any rear sight, but when used with a matching FAB Defense® RBS Rear Back-up Sight, it creates a precise optical tunnel that ensures more accurate aiming and faster target acquisition
- ▶ Low folded profile is smooth and inconspicuous, and will not snag on gear, webbing, or brush
- ▶ Instant spring-locked deployment mechanism will not slip, break or deform
- ▶ No tools needed for easy, rapid elevation adjustments, with positive detent locking
- ▶ Made of extremely durable high-grade polymer and metal

Compatibility:

SPECIFICATIONS

Weight	25 gr
Width	32 mm
Height	14 mm
Length	52 mm
Height (open / deployed)	42 mm
Length (open / deployed)	30 mm
